

2. Identify the system calls to copy the content of one file to another and illustrate the same using c program

```
main.c  [ ] [ ] [ ] Share Run

1  #include <stdio.h>
2  #include <fcntl.h>
3  #include <unistd.h>
4
5  int main() {
6      int src, dest;
7      char buffer[100];
8      int n;
9
10     src = open("source.txt", O_RDONLY);
11     dest = open("destination.txt", O_WRONLY | O_CREAT | O_TRUNC,
```

```
main.c  [ ] [ ] [ ] Share Run

11     dest = open("destination.txt", O_WRONLY | O_CREAT | O_TRUNC,
12                 0644);
13     while ((n = read(src, buffer, sizeof(buffer))) > 0)
14         write(dest, buffer, n);
15
16     close(src);
17     close(dest);
18
19     printf("File copied successfully.\n");
20     return 0;
21 }
```

Output

File copied successfully.

=== Code Execution Successful ===
